## **OPERATING RESULTS & PROFITS**

The Company witnessed a growth of 19% during the year, as the automotive industry showed moderate growth of 7.2% in FY2012. The Company's domestic sales grew by 16% to Rs. 9010.03 Lacs and exports grew by 3% to Rs. 172.30 Lacs. The Company has earned a Profit before tax, depreciation & amortization, finance cost and exceptional items of Rs.1556.39 Lacs as compared to Rs. 1287.69 in the previous year. The Company earned net profit of Rs.349.91 Lacs as compared to net profit of Rs. 322.17 Lacs during the previous year.

The auto sector reported a robust growth rate of 26 percent in the last two years (2010-2012). However, the sector has shown a sluggish growth of 7.2% percent in 2012. The trend is likely to stay in FY 2013, citing a high ownership costs and slow rural income growth, with easing of interest rates expected in the last quarter of the current fiscal the demand is expected to get a fillip. However, the rising incomes, improved affordability and untapped markets present promising opportunities for automobile manufacturers in India. The sale of passenger vehicles is expected to double in the next four years and growth anticipated is higher than the growth achieved in the past 10 years.

The sluggish growth of automobile sector has affected the overall growth of the company in terms of sales and profits. However, the company has achieved a turnover of Rs. 9182.43 Lacs recording a growth of 19% during the year and export turnover of Rs. 172.30 Lacs during the year which is significant in terms of sales growth.

## **BUSINESS OVERVIEW**

The Indian economy, which recorded a growth rate of 8.6% during FY 2010-11, started showing softening indicators in second half of FY 2010-11. This was mainly due to inflationary pressures and continued anti-

inflationary monetary steps taken by Reserve Bank of India (RBI) coupled with the rising fiscal deficit of the Government. In the current year, the inflation continued to remain at higher levels. On the foreign exchange front, higher crude oil prices, lower net capital inflows and lower export growth in the last six months of the year due to worsening global economic scenario, adversely affected the Indian currency.

The automotive industry was affected by the overall macro economic factors discussed above. In particular, the demand was impacted due to higher interest rates and slowing economy. Further, sharp increases in petrol prices adversely impacted the demand for petrol vehicles.

The company which is reliant on the automotive industry expects that the positive inflow of investment by foreign automakers and favorable government support to the upcoming projects will boost sales of auto industry and in turn company's sales will have significant growth in the next year.

## MANAGEMENT DISCUSSION AND ANALYSIS REPORT

## **ECONOMY & BUSINESS OVERVIEW**

India is emerging as a strong automotive R&D hub with foreign players like Hyundai, Suzuki, General Motors setting up their base in India. The foreign automakers are looking to set up their units rather than having JV's with Indian Automakers. With growth in operations, overseas manufacturers are severing local partnerships and infusing billions of dollars into wholly-owned Indian units. This move is further enhanced by Government's support towards setting up centres for development and innovation. The Indian market has taken advantage of the opportunities of growth available in alternative segments like electric cars, vehicles run on natural gas, etc.

On one side we are looking at the growth prospective of auto industry and on the other hand the high interest cost and petrol price hike has put auto industry under pressure. The auto industry has reacted strongly because this will likely drive down demand for petrol–driven vehicles in the current year. As per SIAM the cumulative production data for April-September 2012 shows production growth of only 2.44 percent. The overall growth in domestic sales during April-September 2012 was 3.62 percent, showing a declining trend. During April-September 2012 overall automobile exports registered negative growth. The automotive industry body expressed deep concern about the impact of the steep increase in petrol prices as it will affect the middle class income group as many will put their purchasing plans on hold.

The technical textile market in India has grown to Rs 57,000 crore in 2011-12 from Rs 42,000 crore in 2007-08, and is expected to touch Rs 1.58 lakh crore by 2016-17. The ministry has set up Centre's of Excellence to promote technical and industrial textiles like non-woven, composite, mobiltech and products like conveyor belts which have tremendous potential not only in India, but also at the global level.

## **COMPANY OVERVIEW AND OUTLOOK**

AUNDE India has successfully installed technologically advanced equipments like lamination, embossing machines and in house washing range facilities. The company has already entered the international market through GM global programme and exporting fabrics to Uzbekistan, Egypt etc. The Company is now focusing on expanding its export base to other countries. To compete in global market, AUNDE India has to be self sufficient with advanced technological manufacturing facilities to meet the fabric requirements and quality standards set by the OEM's.

The Company, is in addition to the existing customers like Maruti, Hyundai, Tata, Mahindra, Fiat, has stated supplying fabrics to Nissan, Honda & Volkswagen. AUNDE India is in talks with Toyota India for its upcoming launches.

The company has already started exporting fabrics to GM, Renault etc during the year. The company is taking every effort to increase its market base at global level through technology development, design development and fabric supply agreements with other Group Members like AUNDE Spain, AUNDE Brazil and AUNDE Italy etc.

The overall negative impact of auto market is going to affect the turnover of the company in the next year. The increased cost of raw materials, labour and cost of production has driven down the profits in the current year. The company hopes that prospects of Indian Automobile market to attract foreign investments in India and potential projects set up by foreign auto makers are likely to create opportunities in auto textile markets, and AUNDE India is ready to seize every opportunity and look beyond its existing customers to achieve higher sales and profits in coming years.
