Explanatory statement (Pursuant to Section 102 of the Companies Act, 2013)

No. 3- Approval of Related Party Transactions

M/s. Faze Three Limited is a Public limited Company and Listed on BSE, having its Registered Office and manufacturing facilities at Dadra. The Company is into manufacturing of Home Textile Products like Bathmats, Rugs, Floor Coverings, Blankets, Cushions, Cushion Covers, etc.

Faze Three Limited and Aunde India Limited have entered into an exclusive manufacturing and processing agreement under which Aunde India is entitled to use Faze Three's dyeing unit at Vapi for dyeing its Automotive Fabrics as per the laid down standards. The agreement also lays down terms for dealing with other units of Faze Three in case of any specific requirement of capacity or technology sharing. The transactions are made in the ordinary course of business and are at arm's length price and requisite approvals have been taken from the Audit Committee.

As per the requirement of Section 188 of the Companies Act, 2013, read with Companies (Amendment) Act, 2015 and SEBI (Listing Obligations and Disclosure Requirements), 2015 all material Related Party Transactions shall require approval of the shareholders through an Ordinary Resolution if the transaction or transactions to be entered into individually or taken together with previous transactions during the financial year, exceeds 10% of the annual consolidated turnover of the Company as per the last audited financial statements of the Company.

Faze Three Limited is a Related Party and the transaction as described hereunder would exceed 10% of the annual turnover of the Company for F.Y. 2018-19 as per the audited financial statements of the Company and thus, in terms of the Section, the transactions would require the approval of the members by way of Ordinary Resolution:

Sr. No.	Description	Details		
1.	Name of the related Party	Faze Three Limited		
2.	Name of the Director or KMP who is related	Mr. Ajay Anand		
3.	Nature of relationship	Entity in which Director per Ind AS 24	or has Common	Control as
4.	Transactions (₹ in Crores)	Year ended	2017-18 (Actual)	2018-19 (estimated)

None of the Directors / Key Managerial Personnel of the Company/ their relatives is, in any way, concerned or interested in the said resolution, except for Mr. Ajay Anand.

No.4 - Approval to change the name of the Company from Aunde India Limited to Aunde Faze Three Autofab Limited

The Board of Directors of the Company in the meeting held on 31st August 2018 considered and approved the Change of name of the Company from Aunde India Limited to Aunde Faze Three Autofab Limited subject to the approval of the shareholders of the Company.

As per Section 13 and other applicable provisions if any of the Companies Act, 2013, change of name of the Company requires approval of members of the Company by way of Special Resolution and hence this resolution. Your Directors commend the resolution for approval in the best interest of the company.

The above change in name of the Company was considered in view of the following:

A. Majority of Business done by the company comes from Indian OEMs Maruti Suzuki, M&M, TATA, etc. who prefer to deal with Indian manufacturer. Even foreign OEMs have a strong push towards localization and domestic manufacturers. Also the recent government incentives are around the Make in India / Indian Manufacturers.

B. The company has two promoters who have entered into joint venture, therefore, the erstwhile name correctly reflected the owners / promoters in its name and also contains a reference to its key product offerings i.e. "Autofabrics".

The Board was further of the view that the proposed change in name will result in generating additional value and add credibility to business of the company and the company will also be able to enjoy the domestic goodwill and reputation that Faze Three group enjoys in India.

None of the Directors / Key Managerial Personnel of the Company/ their relatives is, in any way, concerned or interested in the said resolution.

MANAGEMENT DISCUSSION AND ANALYSIS REPORT

Economic and Business overview

The FY 2018 saw steady growth in the Indian economy post demonetisation in FY 2017 which had short term disruptions towards the Q4 of FY 2017. This fiscal saw implementation of GST which is the most significant tax reform for India. The macros / fiscal position in the current year has challenges on account of rising crude prices, hardening interest rates, trade wars and other global geo political factors which have a potential to be a contagion to our economy and business environment. The Indian economy & business is growing steady while making efforts to clock double digit growth in the near term amidst the challenges on the fiscal front, crude prices, global trade wars, currency fluctuations due to shift in inflows / outflows from one region to other, etc. The interest rate cycle has bottomed out and is expected to see a significant uptick in coming months which needs to be handled well by businesses amidst tepid credit growth & health of banking sector owing to various challenges etc. The initiatives taken by government are grassroot & bottom up upliftment of society rather than direct subsidiarizing & populism which is commendable. These initiatives will have their effects over medium to long term with improvement in productivity. Also these has been significant improvement in capital and infrastructure spending over the last 2 years in terms of completion of pending projects and initiating new projects, all of these should have a positive impact on the domestic economy.

Technical Textiles / Automotive Fabrics

The Technical textile has the potential to bring fortunes for Indian textile industry which is blessed with a talent pool of entrepreneurs with understanding in textiles and global exposure. The per capita consumption of technical textiles in India is ~1.7 per kg vis-a-vis ~10-12 kg in developed countries. As per estimates, global market for technical textiles is estimated at \$145 billion in 2015 and is expected to grow at a CAGR of 4 per cent and reach \$170 billion by 2020. Demand for technical textiles will be driven by rapid industrialization, robust growth in construction and infrastructure projects, increasing automobile production, and rising demand from the health care sector and newer applications.

It took India around seven years to increase annual production to ~four million vehicles from ~three million including all types of vehicles. However, the next milestone—five million—is expected in less than five years. Indian Automobile makers have concluded 2017-18 on a strong note with passenger vehicles grew at 7.89 per cent while other segments including commercial vehicles, two and three-wheelers, reporting a strong double-digit growth in domestic sales. Industry body, the Society of Indian Automobile Manufactures (Siam), expects passenger vehicle sales to grow at a high single-digit in 2018-19, while commercial vehicles are likely to grow at low double-digit. Within two-wheelers, motorcycle sales could moderate in the current fiscal.

The Automotive Fabrics industry is directly linked to the growth in passenger car segment and its consumption of fabrics. Other than Automotive fabrics which are consumed in majority, low cost car variants use Vinyl (PVC) for cost reduction and high end variants use Leather / Leatherites and value added fabrics, both of the aforesaid segment is estimated to form at least 20-25% of the total consumption and the same is growing by the day. Key aspects of success in this industry are continuous innovation without adding costs, quality performance & timely execution, long term cost competitiveness, capacities, etc. The company operates in the limited area of automotive fabrics only whereas Technical Textiles as such has a wide gamut of applications.

COMPANY OVERVIEW AND OUTLOOK

The Company is engaged in manufacturing and supply of automotive textiles (specialized in Passenger Vehicles fabrics) to OEM's. It is also engaged in the manufacturing of fabrics used in auditoriums, Luxury buses and railway coaches. Aunde has continuously evolved in development planning and execution strategy to align with specific product needs and standardization of processes. There is constant interaction taking place with OEMs to showcase innovative capabilities which are in sync with the themes / vision of the OEM's for the future launches. The other set of factors that drive all new developments towards Aunde is QDS (Quality, Delivery & Service). Quality levels were drastically improved and 100% compliance to delivery schedules followed with all OEMs. Since all OEMs are Just in Time customers, the inventory flow management is key to gain QDS points.

The company had growth in volume of fabrics supplied during the current year by over 10% from the previous year however the average realization of fabrics has been lower from earlier years owing customer preference moving towards to low cost fabric developments. In terms of Total Revenue, due to the aforesaid the year ended with with growth of ~3% over the last year The coming year is also expected to have improvement in terms of volume however the corresponding growth in Revenue is subject to the trend towards low cost fabrics which is also reflective of the growth in passenger car segments coming to small and medium sized vehicles. Your company is a major producer of fabrics for all OEMs producing vehicles in India for Domestic and Exports, namely Maruti Suzuki, Hyundai, Ford India, M&M, Toyota, Honda, etc. The company is making efforts to gain market share in the current segment and evaluating other avenues of growth.

OPPORTUNITIES AND CHALLENGES

Technical textiles is the emerging area for investment in India. The potential of technical textile in India is still untapped. Technical textiles represents a multi-disciplinary field with numerous end use applications. The production of different items of technical textile industry has been slowly but steadily increasing in the country. India accounts for just 3 per cent of global technical textile production. As compared to countries like Germany where technical textile contributes 50-60 per cent, in India, the contribution is only 12 per cent.

A recent report by Future Market Insights' projects that the world's largest market for technical textiles will be Asia-Pacific during the forecast period, 2017-2027. While the global market for technical textiles is projected to grow at a value CAGR of 4.6%, the Asia-Pacific market will experience a value CAGR of 6.8%. The demand is likely to be highest in countries such as India and China.

The technical textiles are being promoted at the highest level by the government in order to realise the full potential of the critical segment. The government is also offering subsidy for domestic players, who want to set up machinery.

Though the use of Technical textiles is expanding globally, India comprises only 4% of the global technical textiles exports. The technical textiles industry is import-intensive. In the last few years, the industry has witnessed a rise in imports. Though the country currently spends a significant amount on imports, the dependence can eventually be reduced by further investing in technology-heavy products. This presents a huge scope for import substitution. To this extent the inputs in the industry are directly affected by global price trends which is risk to the industry.

Technical textiles is a highly varied subject and comprises of multiple processes to manufacture different products. These processes require different and high level of skill sets from workers which is currently absent in the domestic industry. Majority of the government schemes for manpower training are focused on core textiles such as spinning, weaving & garmenting. There are no such specific curriculum developed for technical textiles. In order to curb this issue, there is an immediate need to organize specific forums for interaction between industry and academia so that specific curriculum could be developed for technical textiles. Also, government can modify their manpower development schemes to align with the requirements of the technical textiles industry.

Technical textiles is an innovation intensive field and to excel in it, focus on product research & development is a must. Prospects of the Indian Textile Industry look promising and many efforts are being made by the Government for the progress of the sector as the country still lacks innovations.

The automotive fabrics segments faces threat / challenges from the PVS / synthetic leather in terms of cost efficiency and artificial leather in terms of acting as a substitute to the automotive fabrics. Also with growing disruption towards electric vehicles might bring unforeseen challenges to the entire automotive value chain. Furthermore, trend towards low cost fabrics has led to shrinking margins and lesser room for investment in R&D and new initiatives which drive innovation.

HUMAN RESOURSES/ INDUSTRIAL RELATIONS

The Company always recognised its Human assets as a critical resource essential for the growth of the Company. The goal of the Human Resources (HR) department is to ensure that the employees are recruited, engaged, retained and motivated to contribute to growth and strategic mission of the Company.

The employee engagement initiatives place greater emphasis on learning and development, providing opportunities for staff to seek aspirational roles, streamlining the Performance Management System and introducing performance-linked rewards. The Company has committed to the development of its employees to strengthen their functional, managerial and leadership capabilities.

Our HR policies ensure working together with the employees for their personal and professional development and at the same time aligning their goals with that of the Company to create a win-win situation.

POLLUTION AND ENVIRONMENTAL CONTROLS

Your Company continued to emphasize on creating pollution compliant and a safe work environment for its employees. The Company has taken up several initiatives on clean technology, energy efficiency, etc., Aunde India Limited is conscious of the vulnerability and the essence of a healthy and clear environmental surrounding.

INDEPENDENT AUDITOR'S REPORT

To the Members of AUNDE INDIA LIMITED

Report on the Audit of the Ind AS Financial Statements

We have audited the accompanying Ind AS financial statements of **AUNDE INDIA LIMITED** ("the Company") which comprise the Balance Sheet as at March 31, 2018, the Statement of Profit and Loss (including Other Comprehensive Income), the Statement of Changes in Equity and Cash Flow Statement for the year then ended, and a summary of significant accounting policies and other explanatory information (herein after referred to as "Ind AS financial statements").

Management's Responsibility for the IND AS Financial Statements

The Company's Board of Directors is responsible for the matters stated in Section 134(5) of the Companies Act, 2013 ("the Act") with respect to the preparation of these Ind AS financial statements that give a true and fair view of the financial position, financial performance including other comprehensive income, changes in equity and cash flows of the Company in accordance with the accounting principles generally accepted in India, including the Indian Accounting Standards ("Ind AS") specified under Section 133 of the Act, read with Rule 7 of the Companies (Accounts)Rules, 2014.

This responsibility also includes maintenance of adequate accounting records in accordance with the provisions of the Act for safeguarding the assets of the Company and for preventing and detecting frauds and other irregularities; selection and application of appropriate accounting policies; making judgments and estimates that are reasonable and prudent; and design, implementation and maintenance of adequate internal financial controls, that were operating effectively for ensuring the accuracy and completeness of the accounting records, relevant to the preparation and presentation of the Ins AS financial statements that give a true and fair view and are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Company or to cease operations, or has no realistic alternative but to do so.

Auditor's Responsibility

Our responsibility is to express an opinion on these Ind AS financial statements based on our audit.

We have taken into account the provisions of the Act, the accounting and auditing standards and matters which are required to be included in the audit report under the provisions of the Act and the Rules made thereunder. We conducted our audit of the Ind AS financial statements in accordance with the Standards on Auditing specified under Section 143(10) of the Act. Those Standards require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether the Ind AS financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and the disclosures in the Ind AS financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the Ind AS financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal financial control relevant to the Company's preparation of the Ind AS financial statements that give a true and fair view in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on whether the Company has in place an adequate internal financial control system over financial reporting and the operating effectiveness of such controls. An audit also includes evaluating the appropriateness of the accounting policies used and the reasonableness of the accounting estimates made by the Company's Directors, as well as evaluating the overall presentation of the Ind AS financial statements.

We are also responsible to conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the entity's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in the auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify the opinion. Our conclusions are based on the audit evidence obtained up to the date of the auditor's report. However, future events or conditions may cause an entity to cease to continue as a going concern.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion on the Ind AS financial statements.

Opinion

In our opinion and to the best of our information and according to the explanations given to us, the Ind AS financial statements give the information required by the Act in the manner so required and give a true and fair view in conformity with the accounting principles generally accepted in India including the Ind AS, of the state of affairs of the Company as at 31st March, 2018, and its Loss (including other comprehensive income), changes in equity and its Cash Flows for the year ended on that date.

Annexure B to the Independent Auditor's Report of even date on the Ind AS Financial Statements of AUNDE INDIA LIMITED - 31st March 2018

Report on the Internal Financial Controls over financial reporting under Clause (i) of Sub-section 3 of Section 143 of the Companies Act, 2013 ("the Act")

We have audited the internal financial controls over financial reporting of **AUNDE INDIA LIMITED** ("the Company") as of March 31, 2018 in conjunction with our audit of the Ind AS financial statements of the Company for the year ended on that date.

Management's Responsibility for Internal Financial Controls

The Company's management is responsible for establishing and maintaining internal financial controls based on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls over Financial Reporting issued by the Institute of Chartered Accountants of India ('ICAI'). These responsibilities include the design, implementation and maintenance of adequate internal financial controls that were operating effectively for ensuring the orderly and efficient conduct of its business, including adherence to company's policies, the safeguarding of its assets, the prevention and detection of frauds and errors, the accuracy and completeness of the accounting records, and the timely preparation of reliable financial information, as required under the Companies Act, 2013.

Auditors' Responsibility

Our responsibility is to express an opinion on the Company's internal financial controls over financial reporting based on our audit. We conducted our audit in accordance with the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting (the "Guidance Note") and the Standards on Auditing, issued by ICAI and deemed to be prescribed under section 143(10) of the Companies Act, 2013, to the extent applicable to an audit of internal financial controls, both applicable to an audit of Internal Financial Controls and, both issued by the Institute of Chartered Accountants of India. Those Standards and the Guidance Note require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether adequate internal financial controls over financial reporting was established and maintained and if such controls operated effectively in all material respects.

Our audit involves performing procedures to obtain audit evidence about the adequacy of the internal financial controls system over financial reporting and their operating effectiveness. Our audit of internal financial controls over

financial reporting included obtaining an understanding of internal financial controls over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. The procedures selected depend on the auditor's judgement, including the assessment of the risks of material misstatement of the Ind AS financial statements, whether due to fraud or error.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion on the Company's internal financial controls system over financial reporting.

Meaning of Internal Financial Controls Over Financial Reporting

A company's internal financial control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal financial control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorisations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorised acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Inherent Limitations of Internal Financial Controls Over Financial Reporting

Because of the inherent limitations of internal financial controls over financial reporting, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may occur and not be detected. Also, projections of any evaluation of the internal financial controls over financial reporting to future periods are subject to the risk that the internal financial control over financial reporting may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Opinion

In our opinion, the Company has, in all material respects, an adequate internal financial controls system over financial reporting and such internal financial controls over financial reporting were operating effectively as at March 31, 2018, based on internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting issued by the Institute of Chartered Accountants of India.

1. General Information

Aunde India Limited (the "Company") is a public company domiciled in India and was incorporated on 3 October 1997 under the provisions of the Companies Act, 1956 applicable in India. The Company's equity shares are listed on the Bombay Stock Exchange. Its registered and principal office of business is located at Dadra & Nagar Haveli. The Company is primarily engaged in the manufacturing of Automotive fabrics and is nominated supplier to all the major O.E.M.'s in India viz. Hyundai, Ford, Maruti Suzuki, Honda, Mahindra, Toyota, Renualt, Tata, Nissan, etc

2. Significant accounting policies

Significant accounting policies adopted by the company are as under:

2.1 Basis of Preparation of Financial Statements

a) Statement of Compliance with Ind AS

Ministry of Corporate Affairs notified roadmap to implement Indian Accounting Standards ('Ind AS') notified under the Companies (Indian Accounting Standards) Rules, 2015 as amended by the Companies (Indian Accounting Standards) (Amendments) Rules, 2016. As per the said roadmap, the company is required to apply Ind AS starting from financial year beginning on or after 1st April,2016. Accordingly, the financial statements of the Company have been prepared in accordance with the Ind AS.

For all periods up to and including the year ended 31 March 2017, the Company prepared its financial statements in accordance with the Accounting Standards notified under the section 133 of the Companies Act 2013, read together with Companies (Accounts) Rules 2014 (Indian GAAP). These financial statements for the year ended 31st March, 2018 are the first the company has prepared in accordance with Ind AS (refer note 4 for information on how the company has adopted Ind-AS).

The financial statements are presented in Indian Rupees ('INR') and all values rounded to the nearest lacs, except otherwise indicated.

Accounting policies have been consistently applied to all the years presented except where a newly issued accounting standard is initially adopted or a revision to an existing accounting standard requires a change in the accounting policy hitherto in use

b) Use of estimates

The preparation of financial statements in conformity with Ind AS requires the Management to make estimate and assumptions that affect the reported amount of assets and liabilities as at the Balance Sheet date, reported amount of revenue and expenses for the year and disclosures of contingent liabilities as at the Balance Sheet date. The estimates and assumptions used in the accompanying financial statements are based upon the Management's evaluation of the relevant facts and circumstances as at the date of the financial statements. Actual results could differ from these estimates. Estimates and underlying assumptions are reviewed on a periodic basis. Revisions to accounting estimates, if any, are recognized in the year in which the estimates are revised and in any future years affected.

2.2 Property, plant and equipment

Property, plant and equipment are stated at original cost inclusive of incidental expenses related to acquisition net of tax / duty credit availed, net of accumulated depreciation and accumulated impairment losses, if any, Such cost includes cost of replacing part of plant and equipment and borrowing cost for long term construction projects if the recognition criteria are met. When significant parts of plant and equipment are required to be replaced at intervals, the Company depreciates them separately based on their specific useful lives. Likewise, when a major inspection is performed, its cost is recognised in the carrying amount of the plant and equipment as a replacement if the recognition criteria are satisfied. All other repair and maintenance costs are recognised in profit and loss as incurred. The present value of the expected cost for the decommissioning of an asset after its use is included in the cost of the respective asset if the recognition criteria for a provision is met

Advances paid towards the acquisition of property, plant and equipment outstanding at each balance sheet date is classified as capital advances under other non-current assets and the cost of assets not put to use before such date are disclosed under 'Capital work-in-progress'. Capital work-in-progress includes cost of property, plant and equipment under installation / under development as at balance sheet date.

Depreciation methods, estimated useful lives

The Company depreciates property, plant and equipment over their estimated useful lives using the straight line method. The estimated useful lives of assets are as follows:

Property, plant and equipment	Useful life in years
Factory Building	30 years
Plant & Machinery	15 years
Laboratory Equipments	10 years
Furniture and Fixtures	10 years
Office Equipment	10 years
Electrical Installations	10 years
Fire Hydrant Systems	15 years
Vehicles	8 years
Computers:	
-Servers	5 years
-End user devices such as, desktops, laptops etc.	3 years

The residual values, useful lives and method of depreciation of property, plant and equipment are reviewed at each financial year end and adjusted prospectively, if appropriate,

Depreciation on addition to property, plant and equipment is provided on pro-rata basis from the date of acquisition. Depreciation on sale/deduction from property, plant and equipment is provided up to the date of processing of sale, deduction as the case may be. Gains and losses on disposals are determined by comparing proceeds with carrying amount. These are included in statement of profit and loss under "Other Income".

2.3 Borrowing costs

Borrowing costs consist of interest and other costs that an entity incurs in connection with the borrowing of funds. Borrowing cost also includes exchange differences to the extent regarded as an adjustment to the borrowing costs

Borrowing costs directly attributable to the acquisition, construction or production of an asset that necessarily takes a substantial period of time to get ready for its intended use or sale are capitalised as part of the cost of the asset. All other borrowing costs are expensed in the period in which they occur.

2.4 Foreign Currency Transactions

Functional and presentation currency

Items included in the financial statements are measured using the currency of the primary economic environment in which the entity operates ('the functional currency'). The financial statements are presented in Indian rupee (INR), which is the Company's functional and presentation currency.

Transactions and balances

On initial recognition, all foreign currency transactions are recorded by applying to the foreign currency amount the exchange rate between the functional currency and the foreign currency at the date of the transaction. Gains/Losses arising out of fluctuation in foreign exchange rate between the transaction date and settlement date are recognised as income or expense in the period in which they arise in the Statement of Profit and Loss.

All monetary assets and liabilities in foreign currencies are restated at the year end at the exchange rate prevailing at the vear end and the exchange differences are recognised in the Statement of Profit and Loss.

Non-monetary items that are measured in terms of historical cost in a foreign currency are translated using the exchange rates at the dates of the initial transactions. Non-monetary items measured at fair value in a foreign currency are translated using the exchange rates at the date when the fair value is determined. The gain or losses arising of transaction of non-monetary items is recognised in line with the gains or losses of the item that gave arise to the translation difference.

2.5 Revenue Recognition

Revenue is recognised to the extent that it is probable that the economic benefits will flow to the Company and the revenue can be reliably measured, regardless of when the payment is being made. Revenue is measured at the fair value of the consideration received or receivable, taking into account contractually defined terms of payment and excluding taxes or duties collected on behalf of the government. The company has concluded that it is the principal in all of its revenue arrangements since it is the primary obligor in all the revenue arrangements as it has pricing latitude and is also exposed to inventory and credit risks.

The specific recognition criteria described below must also be met before revenue is recognised.

Sale of goods:

Revenue from the sale of goods is recognised when the significant risks and rewards of ownership of the goods have passed to the buyer on delivery of goods. Revenue from the sale of goods is measured at the fair value of the consideration received or receivable, net of returns and allowances, trade discounts and volume rebates.

Rendering of Services:

Revenue from sale of services is recognised as per terms of the contract with customers when the outcome of the transactions involving rendering of services can be estimated reliably.

Interest Income:

Interest income is recognized on a time proportion basis taking into account outstanding and the applicable interest rate. Interest income is included under the head "other income" in the statement of profit and loss.

Rental Income

Lease agreements where the risks and rewards incident to the ownership of an asset substantially vest with the lessor are recognised as operating leases. Lease rentals are recognised on straight line basis as per the terms of the agreements in the statement of profit and loss.

Export Incentives

Export Incentive from the government is recognised when there is a reasonable assurance that (i) the company will comply with the conditions attached to them and (ii) the incentive will be received.

When the incentive relates to revenue, it is recognised as income on a systematic basis in the statement of profit or loss over the periods necessary to match them with the related income, which they relate to.

2.6 Taxes

Tax on income for the current period is determined on the basis of estimated taxable income and tax credits computed in accordance with the provisions of the relevant tax laws and based on the expected outcome of assessments / appeals.

(A) Current income tax

Current income tax assets and liabilities are measured at the amount expected to be recovered or paid to the taxation authorities. The tax rates and tax laws used to compute the amount are those that are enacted or substantively enacted, at the year-end date. Current tax assets and tax liabilities are offset where the entity has a legally enforceable right to offset and intends either to settle on a net basis, or to realize the asset and settle the liability simultaneously.

(B) Deferred tax

Deferred income tax is provided in full, using the balance sheet approach, on temporary differences arising between the tax bases of assets and liabilities and their carrying amounts in financial statements. Deferred income tax is also not accounted for if it arises from initial recognition of an asset or liability in a transaction other than a business combination that at the time of the transaction affects neither accounting profit nor taxable profit (tax loss). Deferred income tax is determined using tax rates (and laws) that have been enacted or substantially enacted by the end of the year and are expected to apply when the related deferred income tax asset is realised or the deferred income tax liability is settled.

Deferred tax assets are recognised for all deductible temporary differences and unused tax losses only if it is probable that future taxable amounts will be available to utilize those temporary differences and losses.

Management periodically evaluates positions taken in tax returns with respect to situations in which applicable tax regulation is subject to interpretation. It establishes provisions where appropriate on the basis of amounts expected to be paid to the tax authorities.

Deferred tax assets and liabilities are offset when there is a legally enforceable right to offset current tax assets and liabilities and when the deferred tax balances relate to the same taxation authority.

Current and deferred tax is recognized in statement of profit and loss, except to the extent that it relates to items recognised in other comprehensive income or directly in equity. In this case, the tax is also recognised in other comprehensive income or directly in equity, respectively.

2.7 Inventories

Inventories are valued at the lower of cost and net realisable value. Costs incurred in bringing each product to its present location and condition are accounted for as follows:

Raw materials, packaging materials and stores and spare parts are valued at lower of cost and net realizable value. Cost includes purchase price, (excluding those subsequently recoverable by the enterprise from the concerned revenue authorities), freight inwards and other expenditure incurred in bringing such inventories to their present location and condition. In determining the cost, weighted average cost method is used.

Work in progress, manufactured finished goods and traded goods are valued at the lower of cost and net realisable value. Cost of work in progress and manufactured finished goods is determined on the weighted average basis and comprises direct material, cost of conversion and other costs incurred in bringing these inventories to their present location and condition. Cost of traded goods is determined on a weighted average basis.

Slow and non-moving material, obsolete, defective inventories are duly provided for and valued at actual cost incurred up to the date of balance sheet. Materials and supplies held for use in production of inventories are not written down if the finished products in which they will be used are expected to be sold at or above cost.

Net realisable value is the estimated selling price in the ordinary course of business, less estimated cost of completion and the estimated costs necessary to make the sale.

2.8 Trade Receivables

Trade Receivables are amounts due from customers for sale of goods or services performed in the ordinary course of business. Trade Receivables are recognised initially at fair value. They are subsequently measured at amortised cost using the effective interest method, net of provision for impairment. The carrying value less impairment provision of trade receivables, are assumed to be approximate to their fair values.

2.9 Impairment of non-financial assets

The Company assesses at each year end whether there is any objective evidence that a non-financial asset or a group of non-financial assets is impaired. If any such indication exists, the Company estimates the asset's recoverable amount and the amount of impairment loss.

An impairment loss is calculated as the difference between an asset's carrying amount and recoverable amount. Losses are recognized in Statement of Profit and Loss and reflected in an allowance account. When the Company considers that there are no realistic prospects of recovery of the asset, the relevant amounts are written off. If the amount of impairment loss subsequently decreases and the decrease can be related objectively to an event occurring after the impairment was recognised, then the previously recognised impairment loss is reversed through Statement of Profit and Loss.

The recoverable amount of an asset or cash-generating unit (as defined below) is the greater of its value in use and its fair value less costs to sell. In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset. For the purpose of impairment testing, assets are grouped together into the smallest group of assets that generates cash inflows from continuing use that are largely independent of the cash inflows of other assets or groups of assets (the "cash-generating unit").

2.10 Provisions and contingent liabilities

Provisions are recognized when there is a present obligation as a result of a past event, it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation and there is a reliable estimate of the amount of the obligation. Provisions are measured at the best estimate of the expenditure required to settle the present obligation at the Balance sheet date.

If the effect of the time value of money is material, provisions are discounted using a current pre-tax rate that reflects, when appropriate, the risks specific to the liability. When discounting is used, the increase in the provision due to the passage of time is recognized as a finance cost.

The Company records a provision for decommissioning costs. Decommissioning costs are provided at the present value of expected costs to settle the obligation using estimated cash flows and are recognized as part of the cost of the particular asset. The cash flows are discounted at a current pre-tax rate that reflects the risks specific to the decommissioning liability. The unwinding of the discount is expensed as incurred and recognized in the statement of profit and loss as a finance cost. The estimated future costs of decommissioning are reviewed annually and adjusted as appropriate. Changes in the estimated future costs or in the discount rate applied are added to or deducted from the cost of the asset.

Contingent liabilities are disclosed when there is a possible obligation arising from past events, the existence of which will be confirmed only by the occurrence or non-occurrence of one or more uncertain future events not wholly within the control of the Company or a present obligation that arises from past events where it is either not probable that an outflow of resources will be required to settle or a reliable estimate of the amount cannot be made.

2.11 Cash and cash equivalents

Cash and cash equivalent in the balance sheet comprise cash at banks, cash on hand and demand deposits with an original maturity of three months or less, which are subject to an insignificant risk of changes in value.

For the purposes of the cash flow statement, cash and cash equivalents include cash on hand, cash in banks and demand deposits.

2.12 Employee Benefits

(A) Short-term employee benefits

All employee benefits payable only within twelve months of rendering the service are classified as short term employee benefits. Benefits such as salaries, wages, etc. and the expected cost of bonus, ex-gratia, and incentives are recognised in the period during which the employee renders the related service.

(B) Post-employment benefits

(i) Defined contribution plan

Government Provident Scheme is a defined contributed plan. The contribution paid/payable under the scheme is recognised in the statement of profit and loss during the period in which the employee renders the related services.

(ii) Defined benefit plans

Gratuity: The Company provides for gratuity, a defined benefit plan (the 'Gratuity Plan') covering eligible employees in accordance with the Payment of Gratuity Act, 1972. The Gratuity Plan provides a lump sum payment to vested employees at retirement, death, incapacitation or termination of employment, of an amount based on the respective employee's salary. The Company's liability is actuarially determined (using the Projected Unit Credit method) at the end of each year. Actuarial losses/gains are recognized in the other comprehensive income in the year in which they arise.

2.13 Earnings Per Share

Basic earnings per share is calculated by dividing the net profit or loss for the year attributable to equity shareholders by the number of equity shares outstanding during the year. Earnings considered in ascertaining the Company's earnings per share is the net profit or loss for the year. The number of equity shares outstanding during the year and for all the years presented is adjusted for events, such as bonus shares, other than the conversion of potential equity shares, that have changed the number of equity shares outstanding, without a corresponding change in resources.

For the purpose of calculating diluted earnings per share, the net profit or loss for the year attributable to equity shareholders and the number of shares outstanding during the year is adjusted for the effects of all dilutive potential equity shares.

2.14 Rounding off amounts

All amounts disclosed in financial statements and notes have been rounded off to the nearest lacs as per requirement of Schedule III of the Act, unless otherwise stated.

3. Significant accounting judgments, estimates and assumptions

The preparation of financial statements requires management to make judgments, estimates and assumptions that affect the reported amounts of revenues, expenses, assets and liabilities, and the accompanying disclosures, and the disclosure of contingent liabilities. Uncertainty about these assumptions and estimates could result in outcomes that require a material adjustment to the carrying amount of assets or liabilities affected in future years.

Estimates and assumptions

The key assumptions concerning the future and other key sources of estimation uncertainty at the yearend date, that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year, are described below. The Company based its assumptions and estimates on parameters available when the financial statements were prepared. Existing circumstances and assumptions about future developments, however, may change due to market changes or circumstances arising that are beyond the control of the Company. Such changes are reflected in the assumptions when they occur.

(A) Taxes

Deferred tax assets are recognized for unused tax losses to the extent that it is probable that taxable profit will be available against which the losses can be utilized. Significant management judgment is required to determine the amount of deferred tax assets that can be recognized, based upon the likely timing and the level of future taxable profits together with future tax planning strategies.

The Company neither have any taxable temporary difference nor any tax planning opportunities available that could partly support the recognition of these losses as deferred tax assets. On this basis, the Company has determined that

it cannot recognize deferred tax assets on the tax losses carried forward except for the unabsorbed depreciation. Refer Note 30

(B) Defined benefit plans (gratuity benefits)

The cost of the defined benefit plans such as gratuity are determined using actuarial valuations. An actuarial valuation involves making various assumptions that may differ from actual developments in the future. These include the determination of the discount rate, future salary increases and mortality rates. Due to the complexities involved in the valuation and its long-term nature, a defined benefit obligation is highly sensitive to changes in these assumptions. All assumptions are reviewed at each year end.

The principal assumptions are the discount and salary growth rate. The discount rate is based upon the market yields available on government bonds at the accounting date with a term that matches that of liabilities. Salary increase rate takes into account of inflation, seniority, promotion and other relevant factors on long term basis. For details refer Note 32

4. First-time adoption of Ind-AS

These financial statements are the first set of Ind AS financial statements prepared by the Company. Accordingly, the Company has prepared financial statements which comply with Ind AS applicable for year ending on 31 March 2018, together with the comparative year data as at and for the year ended 31 March 2017, as described in the significant accounting policies. In preparing these financial statements, the Company's opening balance sheet was prepared as at 1 April 2016, being the Company's date of transition to Ind AS. This note explains the principal adjustments made by the Company in restating its Indian GAAP financial statements, including the balance sheet as at 1 April 2016 and the financial statements as at and for the year ended 31 March 2017.

4.1 Exemptions availed on first time adoption of Ind AS

Ind AS 101, First-time Adoption of Indian Accounting Standards, allows first-time adopters certain exemptions from the retrospective application of certain requirements under Ind AS. The Company has accordingly applied the following exemptions.

(a) Deemed Cost

Since there is no change in the functional currency, the Company has elected to continue with carrying value for all of its property, plant and equipment as recognized in its Indian GAAP financial statements as its deemed cost at the date of transition. Accordingly the management has elected to measure all of its property, plant and equipment, investment properties at their Indian GAAP carrying value.,

(Amount in INR lacs, unless otherwise stated)

4.2 Reconciliations

The following reconciliations provides the effect of transition to Ind AS from Indian GAAP in accordance with Ind AS 101, First-time Adoption of Indian Accounting Standards:

(f) Notes to first-time adoption

(i) Defined benefit liabilities

Profit as per Ind AS

Both under Indian GAAP and Ind AS, the Company recognized costs related to its post-employment defined benefit plan on an actuarial basis. Under Indian GAAP, the entire cost, including actuarial gains and losses, are charged to Statement of Profit and Loss. Under Ind AS, re-measurements comprising of actuarial gains and losses are recognized immediately in the balance sheet with a corresponding debit or credit to retained earnings through OCI. Thus the employee benefit cost for the year ended 31 March 2017 is reduced by ₹ 6.69 lacs and re-measurement gains/ losses on defined benefit plans of the corresponding amount has been recognized in the OCI, net of taxes.

(ii) Other comprehensive income

The concept of Other Comprehensive Income (OCI) did not exist under Indian GAAP.

(Amount in INR lacs, unless otherwise stated)

31 Earnings/ Loss per share

Basic earnings /(loss) per share amounts are calculated by dividing the profit/loss for the year attributable to equity holders by the number of equity shares outstanding during the year.

Diluted earnings /(loss) per share amounts are calculated by dividing the profit/loss attributable to equity holders by the number of equity shares outstanding during the year plus the number of equity shares that would be issued on conversion of all the dilutive potential equity shares into equity shares.

The following reflects the income and share data used in the basic and diluted EPS computations:

	31 March 2018	31 March 2017

The transactions with related parties are made on terms equivalent to those that prevail in arm's length transactions. There have been no guarantees provided or received for any related party receivables or payables. For the year ended 31 March 2018, the Company has not recorded any impairment of receivables relating to amounts owed by related parties. This assessment is undertaken each financial year through examining the financial position of the related party and the market in which the related party operates.

34 Segment reporting

The Company has only one segment of activity namely "Automotive Fabrics".

35 Fair values of financial assets and financial liabilities

The fair value of other current financial assets, cash and cash equivalents, trade receivables, investments trade payables, short-term borrowings and other financial liabilities approximate the carrying amounts because of the short term nature of these financial instruments.

The amortized cost using effective interest rate (EIR) of non-current financial assets consisting of security and term deposits are not significantly different from the carrying amount.

Financial assets that are neither past due nor impaired include cash and cash equivalents, security deposits, term deposits, and other financial assets.

The impact of fair value on non-current borrowing, non-current security deposits and non-current term deposits are not significant and therefore the impact of fair value is not considered for above disclosure.

36 Fair value hierarchy

The following is the hierarchy for determining and disclosing the fair value of financial instruments by valuation technique:

- •Level 1 Quoted prices (unadjusted) in active markets for identical assets or liabilities.
- •Level 2 Inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly (i.e. as prices) or indirectly (i.e. derived from prices).
- •Level 3 Inputs for the assets or liabilities that are not based on observable market data (unobservable inputs).

No financial assets/liabilities have been valued using level 1 fair value measurements.

The following table presents fair value hierarchy of assets and liabilities measured at fair value on a recurring basis:

Fair value measurement hierarchy of assets

	31 March 2018	31 March 2017	1 April 2016
Level 1 (Quoted price in active markets)	-	-	-
Level 2			
Financial assets measured at fair value through profit or loss	-	-	-
Financial liability measured at fair value through profit or loss	-	-	-
Level 3			
Financial assets measured at fair value through profit or loss			
Trade receivables	3,256.98	3,348.53	3,355.14
Security deposits	15.91	27.31	44.56
Cash and cash equivalents	12.18	129.00	153.65
Bank balances other than cash and cash equivalent	5.72	39.54	40.29
Interest accrued on fixed deposits	0.24	0.49	47.92

The carrying amounts of trade recivables, cash and cash equivalents and other bank balances, interest on fixed deposits are considered to approximate their fair values due to their short term nature. The carrying amounts of long term security deposits are considered to approximate their fair value.

(Amount in INR lacs, unless otherwise stated)

Financial liability measured at amortized cost

Borrowings	7,093.56	6,476.80	7,010.11
Trade payables	753.78	1,702.92	2,091.98
Interest accrued but not due on loan	17.48	22.10	28.62

The carrying amount of trade payables, payables for capital expenditure are considered to approximate their fair values due to their short term nature. They are classified as level 3 fair values in the fair value heirarchy due to the inclusion of unobservable inputs including own and counterparty credit risk.

37 Financial risk management objectives and policies

The Company is exposed to various financial risks. These risks are categorized into market risk, credit risk and liquidity risk. The Company's risk management is coordinated by the Board of Directors and focuses on securing long term and short term cash flows. The Company does not engage in trading of financial assets for speculative purposes.

(A) Market risk

Market risk is the risk that the fair value of future cash flows of a financial instrument will fluctuate because of changes in market prices. Market risk comprises three types of risk: interest rate risk, currency risk and other price risk, such as equity price risk and commodity risk. Financial instruments affected by market risk include borrowings and derivative financial instruments.

(i) Interest rate risk

Interest rate risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market interest rates. The Company exposure to the risk of changes in market interest rates relates primarily to the Company's long-term debt obligations with floating interest rates.

The Company manages its interest rate risk by having a balanced portfolio of fixed and variable rate loans and borrowings. Interest rate sensitivity

The following table demonstrates the sensitivity to a reasonably possible change in interest rates on that portion of loans and borrowings. With all other variables held constant, the Company's profit before tax is affected through the impact on floating rate borrowings, as follows:

	decrease in basis points	before tax (₹ in lacs)
2018	25 bps	11.25
2017	25 bps	9.71

(ii) Foreign currency risk

The Company is exposed to foreign currency risk arising mainly on export of finished goods and import of raw material. The carrying amounts of Company's foreign currency denominated financial assests and financial liabilities at the end of the reporting period are as follows:

	31 March	2018	31 Mar	ch 2017
	INR	USD	INR	USD
Trade receivables (unhedged)	183.2	2.82	94.43	1.46
Trade payables (unhedged)	49.77	0.77	116.16	1.79
The following significant rate have been applied during the year			Year end	spot rate
			31 March 2018	31 March 2017
USD 1			65.04	64.84
EURO 1			80.62	69.25

Foreign currency sensitivity

The following table demonstrates the sensitivity to a reasonably possible change in the US dollar exchange rate (or any other material currency), with all other variables held constant, of the Company's profit before tax (due to changes in the fair value of monetary assets and liabilities). The Company's exposure to foreign currency changes for all other currencies is not material.

	Change in US\$ rate	Effect on profit before tax
2018 (USD/INR)	1%	1.83
2017 (USD/INR)	1%	0.94

(Amount in INR lacs, unless otherwise stated)

(B) Credit risk

Credit risk is the risk of financial loss to the Company if a customer or counterparty to a financial instrument fails to meet its contractual obligations. Credit risk arises principally from the Company's receivables from deposits with landlords and other statutory deposits with regulatory agencies and also arises from cash held with banks and financial institutions. The maximum exposure to credit risk is equal to the carrying value of the financial assets. The objective of managing counterparty credit risk is to prevent losses in financial assets. The Company assesses the credit quality of the counterparties, taking into account their financial position, past experience and other factors.

balances in bank accounts required to meet a month's operational costs. The Management reviews the bank accounts on regular basis and fund drawdowns are planned to ensure that there is minimal surplus cash in bank accounts. The Company does not foresee any credit risks on deposits with regulatory authorities.

(C) Liquidity risk

Liquidity risk is the risk that the Company will not be able to meet its financial obligations as they become due. The Company manages its liquidity risk by ensuring, as far as possible, that it will always have sufficient liquidity to meet its liabilities when due.

The table below summarizes the maturity profile of the Company's financial liabilities:

	Less than 3 months	3 to 12 months	1 to 5 years	More than 5 years	Total
